

## NEW FEATURES

### ■ EXTERIOR

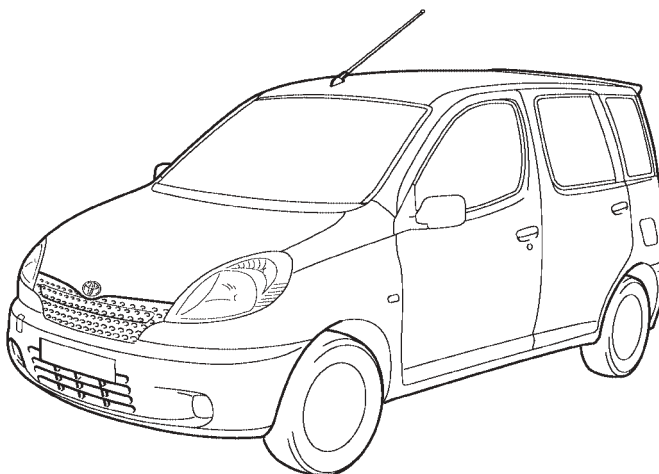

#### 1. Front View

- The shapes of the front bumper, radiator grill and headlight have been changed to provide a front view with a striking bright impression.
- The front bumper has been changed to the opening portion and around the fog lights to provide both newness and a feeling of familiarity at the same time. Corner protection molding has been adopted to reduce repair costs if vehicle damage occurs.
- The radiator grill has been given mesh with various opening sizes to accentuate its sleek appearance.
- The parking lights have been given an independent teardrop shape to freshen the headlights. The turn signal lights portion has been plated to provide an overall bright feeling.
