- SLLC is pre-mixed (50% coolant and 50% distilled water), so no dilution is needed when adding or replacing SLLC in the vehicle.
- If LLC is mixed with SLLC, the interval for LLC (every 40,000 km/25,000 miles or 24 months) should be used.
- You can also apply the new maintenance interval (every 80,000 km/50,000 mile) to vehicles initially filled with LLC (red-colored) if you use SLLC (pink-color) for the coolant change.
