

The diagram is a detailed wiring schematic for the 1996 Oldsmobile Cutlass Supreme, organized into three main vertical sections: Power Source, Power Outlet, and Clock.

- Power Source (Left):** This section shows the electrical supply starting from the **BATTERY** at the bottom. The main power line (B) passes through a **100A J/B NO. 2** (Junction Block) and an **140A ALT** (Alternator). It then splits into two main branches:
  - Branch 1 (Top):** Goes through a **20A AM1 NO. 2** fuse, an **80A AM1 NO. 1** fuse, and a **15A ECU-B** fuse to the **15A CIGAR** outlet.
  - Branch 2 (Bottom):** Goes through a **15A ECU-B** fuse, a **15A PWR OUTLET**, and a **12(2F)** fuse to the **15A PWR OUTLET**.
- Power Outlet (Middle):** This section contains the distribution points for various accessories:
  - ACC RELAY:** Controlled by the **IGNITION SW** (Terminal 3), it provides power to the **15A CIGAR** outlet and the **15A PWR OUTLET**.
