

HIACE

OUTLINE OF NEW FEATURES

The following changes are made for the new Hiace.

1. Model Line-up

The Australia model with the automatic transmission (LH172R-RBPRSQ) has been discontinued.

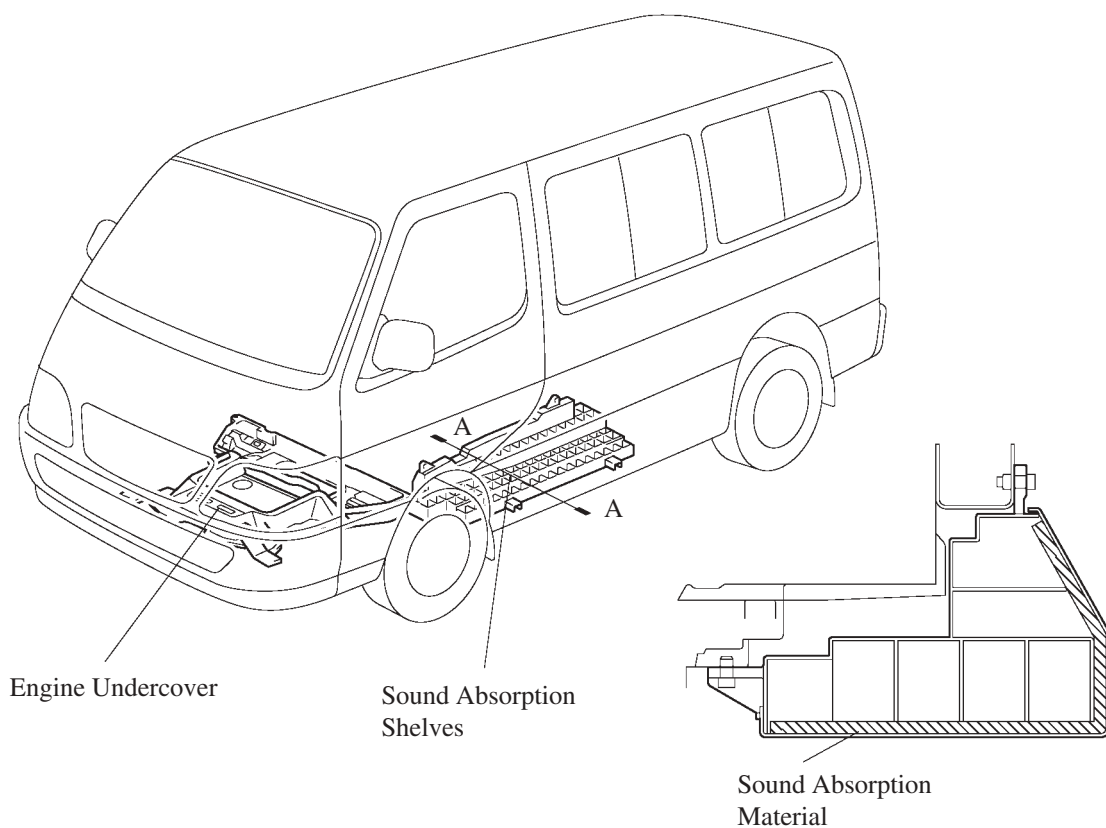

2. 5L Engine

- The manual transmission model for Australia uses an ACSD (Automatic Cold Start Device), TCV (Timing Control Valve), and an EGR (Exhaust Gas Recirculation) system in order to reduce exhaust gas emissions in compliance with the European STEP-II regulations.
- ACSD and TCV have been discontinued to the injection pump of G.C.C. countries model.

3. 5L-E Engine

The following new features have been adopted on the Hong Kong model to reduce engine noise:

- Addition of intake resonator
- Adoption of engine undercover and sound absorption shelves

A-A Cross Section

4. Brake

The brake control system (ABS) is provided on the Thailand model (RZH153R-RBMNE) as optional equipment. The basic construction and operation are the same as previous model.

5. Seat Belt

On the commuter model for general countries, 2-point NR (Non-Retractor) type seat belts for the rear seat are provided as optional equipment.

6. Power Window and Door Lock Control System

Power windows and a door lock control system are standard equipment on all models for Russia.

7. Slide Door Closer System

A slide door closer system, which fully closes the slide door automatically if the slide door is ajar, has been adopted on the Thailand model (RZH153R-RBMNE) as optional equipment.
