TROUBLESHOOTING PROBLEM SYMPTOMS TABLE

TCODE O

HINT:

Before troubleshooting the turbocharger, first check the engine itself. (valve clearance, engine compression, injection timing etc.)

INSUFFICIENT ACCELERATION, LACK OF POWER OR EXCESSIVE FUEL CONSUMPTION

Possible Cause	Check Procedure and Correction Method	See page
1.[Turbocharging[pressure[i]oo[]ow	Check[]urbocharging[]pressure.	TC-4
2. Restricted ntake system	Check intake air system, and repair or replace parts as necessary.	EM-23 *1
3Leak[in[intake[air[system	Check intake air system, and repair or replace parts as necessary.	EM-23 *1
4. ☐Restricted[exhaust[system	Check exhaust system, and repair or replace parts as necessary.	EM-23 *1
5Leak[ijn[exhaust[system	Check exhaust system, and repair or replace parts as necessary.	EM-23 *1
6. ☐Erratic ☐urbocharger [operation	Check exhaust system, and repair or replace parts as necessary.	EM-23 *1

ABNORMAL NOISE

Possible Cause	Check Procedure and Correction Method	See page
Turbocharging heat insulator resonance	Check for loose, improerly installed or deformed insulator nuts and bolt, and repair or replace as necessary.	TC-2
2. Exhaust pipe leaking or vibrating	Check for deformed exhaust pipe, loose bolts or damaged gasket, and repair or replace as necessary.	*1
3. Erratic turbocharger operation	Insufficient acceleration, lack of power or excessive fuel consumption.	TC-2

EXCESSIVE OIL CONSUMPTION OR WHITE EXHAUST NOTICE:

Some oil mist in blowby from PCV is normal. Do not mistake it for oil leak from turbocharger.

Possible Cause	Check Procedure and Correction Method	See page
Faulty turbocharger oil seal	Check for oil leakage in exhaust system. • Remove exhaust manifold converter or turbine elbow from turbocharger, and check for excessive carbon deposits on turbine wheel. Excessive carbon deposits indicate a faulty turbocharger. Check for oil leakage in intake air system. • Check for axial and radial plays of turbine shaft, and replace turbocharger if necessary.	TC-7
